

## Procedura 6. Generarea unei parole specifice unei aplicatii din contul e-uvt.ro

### IMPORTANT:

1. Aceasta este o operatie optionala, daca accesati contul e-uvt.ro doar din browser, pentru securizarea contului dumneavoastra.
2. Devine, insa obligatorie, in cazul in care doriti sa accesati contul dumneavoastra, de pe mobil, tableta sau un program de genul Microsoft Outlook.

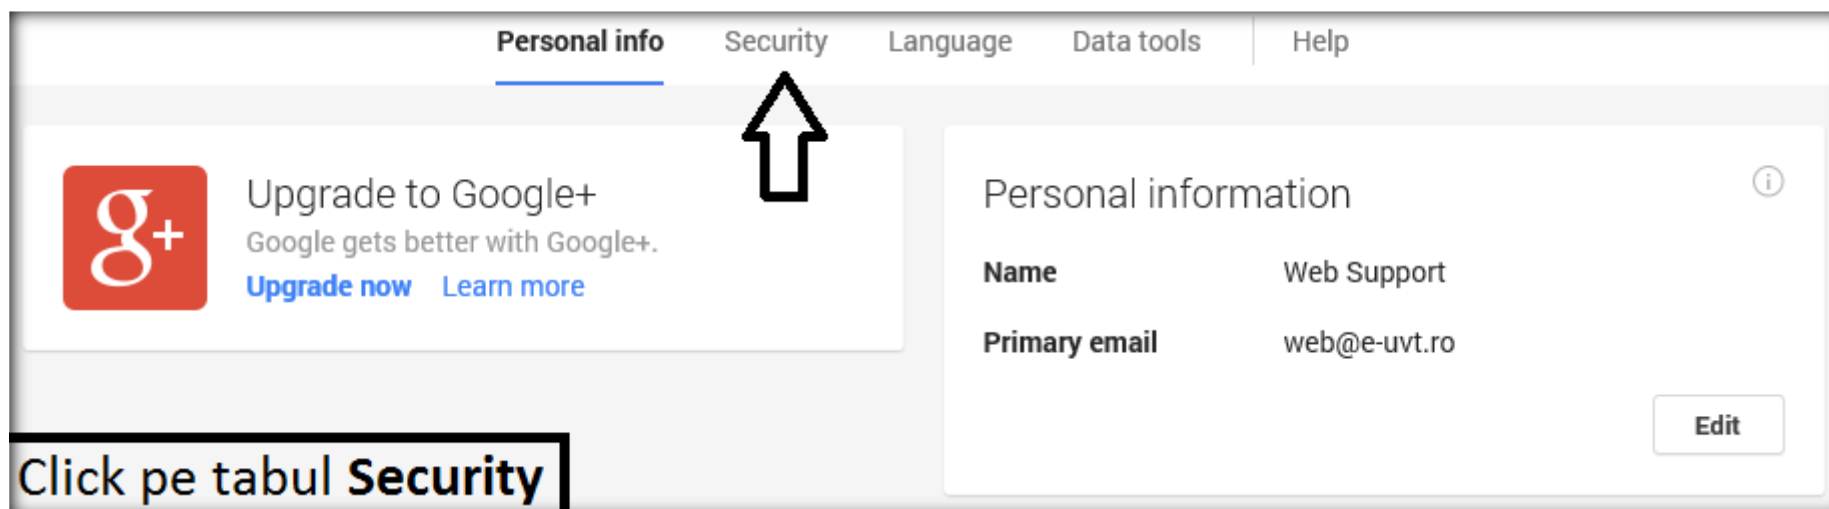

In continuare simbolul  se va utiliza pentru a indica pozitia pe ecran unde se cer introduceri de date sau confirmari.

In primul rand, se da click in partea din dreapta sus pe numele de utilizator sau iconita de forma din imaginea de mai jos. Acolo se acceseaza optiunea **Cont**

In continuare, in fereastra nou deschisa faceti click pe tabul **Security**

**Procedura 6.** Generarea unei parole specifice unei aplicatii din contul **e-uvt.ro**

The screenshot shows the Google account settings interface. At the top, there are navigation tabs: **Personal info**, **Security**, **Language**, **Data tools**, and **Help**. The **Security** tab is highlighted with a black arrow pointing upwards. Below the tabs, on the left, is a promotional banner for Google+ with the text "Upgrade to Google+", "Google gets better with Google+.", and links for "Upgrade now" and "Learn more". On the right, the "Personal information" section is visible, showing the name "Web Support" and the primary email "web@e-uvt.ro", with an "Edit" button at the bottom right. A black-bordered callout box in the bottom left corner contains the text "Click pe tabul **Security**".

## Procedura 6. Generarea unei parole specifice unei aplicatii din contul e-uvt.ro

In fereastra noua, introduceti in casuta numele aplicatiei pentru care generate parola si apoi dati click pe **Generate Password**.

### Authorized Access to your Google Account

---

#### Application-specific passwords

Some applications that work outside a browser aren't yet compatible with 2-step verification and cannot ask

- Older Android smartphones
- Mail clients such as Microsoft Outlook
- Chat clients such as Google Talk, AIM, etc.

To use these applications, you first need to **generate an application-specific password**. Next, enter that

[▶ Watch the video on application-specific passwords](#)

---

#### Step 1 of 2: Generate new application-specific password

Enter a name to help you remember what application this is for:

Name:  ✕  **1.**

ex: "Bob's Android", "Gmail on my iPhone", "GoogleTalk", "Outlook - home computer", "Thunderbird"

---

Your application-specific passwords	Creation date	Last used date	
galaxy sIII	Jun 6, 2013	Jun 6, 2013	[ <a href="#">Revoke</a> ]

## Procedura 6. Generarea unei parole specifice unei aplicatii din contul e-uvt.ro

Textul din chenar, pe fundal galben este parola specifica aplicatiei solicitate. NU este necesar sa o memorati. Se introduce doar odata in aplicatie / telefon / tableta. Spatiile dintre caractere nu conteaza. La final, dupa ce a-ti introdus-o in aplicatie / telefon / tableta, faceti click pe **Done** si inchideti fereastra, pentru a reveni la mail.

### Authorized Access to your Google Account

---

#### Application-specific passwords

Step 2 of 2: Enter the generated application-specific password

You may now enter your new application-specific password into your application. Note that this password grants complete access to your Google Account. For security reasons, it will not be displayed again:

**lcob rzez ydwj byaq**

No need to memorize this password.

You should need to enter it only once. Spaces don't matter.

Your application-specific passwords	Creation date	Last used date	
galaxy sIII	Jun 6, 2013	Jun 6, 2013	[ <a href="#">Revoke</a> ]
aplicatie	Jan 22, 2014	Unavailable	[ <a href="#">Revoke</a> ]
